

Mock Interview – 30 Minutes

Fictional Role: Sarah, Community Organizer

Interviewer: You (Business Analyst or Developer)

Interview Structure

0–5 mins: Introduction

- Purpose of interview
- What the app aims to solve
- Ask Sarah how she currently manages events

5–15 mins: Functional Requirements

- What core features are needed?
 - Event creation (title, date, location)
 - RSVP and attendance tracking
 - Volunteer sign-up
 - Notifications/reminders
 - File sharing (flyers, maps)
 - Comments or Q&A

15–20 mins: Non-Functional Requirements

- Should the app work offline?
- Preferred devices/platforms?
- Accessibility needs?
- Any data security or privacy concerns?

20–25 mins: Pain Points and Wish List

- What problems do you face today when organizing?
- Anything you've seen in other apps you liked?

25–30 mins: Wrap-up

- Recap key needs
- Ask if they'd like to participate in testing/provide ongoing feedback

One-Page Requirements Summary Brief

App Name: *EventHub* – A community event organization platform.

Functional Requirements

- Users can create and manage events with title, description, location, date, time.
- Attendees can RSVP to events and receive confirmations.
- Volunteer roles can be created; users can sign up to help.
- Push/email notifications for event updates and reminders.
- Event pages support file uploads (PDFs, images).
- Event chat/Q&A section for participant interaction.

Non-Functional Requirements

- Mobile-first responsive web app.
- Offline access for viewing saved events.
- Data encryption for user information and secure login.
- ADA-compliant design for accessibility.
- Scalable to support events from small meetups to 1000+ attendees.

Documentation & Traceability

- **Requirements Document:** Maintained in a shared repository (e.g., Confluence, Google Docs).
- **User Stories Format:**
 - *As a user, I want to RSVP to events so I can confirm my attendance.*
- **Traceability Matrix:**
 - Each requirement is assigned an ID (e.g., FR1, NFR3) and linked to:
 - Design components
 - Implementation modules
 - Test cases
- **Change Log:** Tracks modifications, approvals, and versioning.
